

Land Registry Boundaries

Land Registry data is now available in digital map format, allowing you to have access to the data within PT-Mapper. This valuable and insightful data allows you to verify registered land against your current digital map data such as your Estate boundary, allowing you to take control of this side of land management.

The Land Registry titles:

- » Identify queries and anomalies with Estate Boundary
- » Verify land ownership against OS MasterMap data, such as rivers and boundaries
- » Identify exact ownership areas and features
- » Create maps of separate Land Registry titles.

Process to obtain digital map data

1. Submit to Pear Technology the list of Land Registry titles. (This should be done on an excel spread sheet)
 2. This data shall be sent to Land Registry
 3. The land registry map data is returned, imported, prepared and placed on your maps
- » This service is for new maps or for overlaying onto existing maps

Price

- » £2.50 per title (ex VAT)
- » Minimum order of £65
