

Cemetery Searcher

Online Burial Records linked to an Interactive Cemetery Map

Cemetery Searcher is an online cemetery search facility which enables the public to easily search digitised burial records to find ancestors, as well as any other people of interest, and locate their grave or memorial on a digital map. With its easy-to-use search interface and rapid processing speeds, Cemetery Searcher will save

your staff valuable time previously spent searching through burial record books.

The search results display the burial information legally allowed in the public domain including the deceased's forename, surname, grave number, age at death, date of death and additional recorded comments such as occupation.

Features

- » Using our unique search platform, burial plots can be quickly located and highlighted on a map.
- » Additional documents such as headstone photographs or burial register scans can be included and displayed.
- » Search results and the map can be printed.
- » The landing page can be easily personalised by displaying your organisation's name, logo and a background image of your choice.
- » The cemetery map itself uses high quality digital Ordnance Survey. There is also an extensive background map using the OpenStreetMap (R) API to show the cemetery's location.
- » The site can be accessed on your smart phone which enables quick and convenient access to your burial records and map whilst on-site.

Cemetery Searcher

Search and locate your cemetery records quickly on a map

Description

- » Allows the public to easily search for records within your digitised cemetery database to find ancestors, family members and any other people of interest.
- » Displays information on the plot occupier's forename, surname, grave number, age at death, date of death and additional comments e.g. occupation.
- » Using our unique search platform, burial plots can be quickly located and highlighted on a map and linked to additional documents e.g. photographs.
- » With its easy-to-use search interface and rapid processing times, Cemetery Searcher will save you valuable time searching through old records.
- » Uses the most up-to-date Ordnance Survey data available, which shows all surrounding features for context and remains crystal clear at all scales.

Quickly finds records related to your search criteria...

Surname	Forename(s)	Grave Number	Age	Date of Death
Hawkins	Joseph	1-672	96	08 May, 1954
Weeks	Iris Jessie	1-672	81	02 March, 1984

...and plots the burial location on a map!

Process

Requirements: A digital map of your cemetery and digital burial records.

Digital Map: If you already have a digital map we may be able to convert this for use in Cemetery Searcher. Alternatively Pear Technology will create your digital cemetery map using photocopies, photographs and scanned images of existing material. If there are no useable maps available, we can arrange for a cemetery to be professionally surveyed. Whatever methods are used, we try to minimise impact on you and your staff.

Burial Records: Pear Technology will take a copy of your digital burial records, which can be exported from most Burial Administration Systems, and extract the relevant fields for use in Cemetery Searcher. This process is repeated annually ensuring the website remains up to date.

Further information

For further information and examples of cemetery maps visit our website www.peartechnology.co.uk, or to arrange a no-obligation on-site demonstration, please contact us on **023 9249 9689** or email info@peartechnology.co.uk

System Requirements

Cemetery Searcher is a web-based application and so is 'platform independent' and will only require that a good internet connection.
